

# TRACTION UNIT

## 101RBT

Remote controlled unit for reconductoring, ground wire/OPGW replacement and for conductor's protection system installation. Suitable also for LIVE LINE activities.

### Performance

Traction capacity	1,5 kN
Speed	20 m/min
Weight	53 kg

### With 24 V cc motors (Optional)

Traction capacity	1,2 kN
Speed	25 m/min
Weight	55 kg

### Wheels

Translation wheels	Ø 150 x 38 mm
Contrast wheels	Ø 52,5 x 38 mm

### Gasoline generator configuration

- Translation by means of rubber coated wheels for conductor diameter from 12 to 36 mm, able to pass-over on the middle span joint up to 44 mm (hexagonal)
- Adjustable contrast aluminium wheels
- Stationary mechanical brake system
- 2 on board electrical motors 230 V AC powered from a gasoline electric generator
- Remote wireless control IP67
- Towing and balanced lifting points

### Gasoline generator configuration

AT101RBT-001 2 electrical motors 24 V CC powered from rechargeable batteries (charger included)
